

Feb. 9, 2017

Dear GC3,

It was great to see an endorsement of higher interim GHG reduction goals at your Jan. 19 meeting. The fact that this endorsement included a tacit acknowledgement of the economic benefits of more ambitious goals is also great.

In the upcoming legislative session, I hope DEEP can push for an amendment to the Global Warming Solutions Act-in regard to the new interim goals. A corresponding increase in the RPS in the final CES would also be great. Additionally, there needs to be a roll back of the energy efficiency fund raids.

Sincerely,

James Root

Danbury
