Dear Jeff it was nice to attend the first committee on the Long Island sound . My name is Mike g Papa. I practice agro ecological landscape for 10 years . The area of opportunity (in my opinion) is to re - educate the clients FIRST, and landscapers business owners SECOND on the lost skills our ANCESTORS USED , to better manage the ECOLOGY air , water and Carbon . This is the greatest challenge and opportunity for people to engage in this century and behind if we love to enjoy a healthy environment !!! With the use of QUICK FIXES in landscape practices our modern people today have NO CLUE (on basic care taking practices) ! As a result we are suffering the consequences of pollution , lime diseases, Mosquitos explosion ! due to a out of balance soil food web organisms dynamics . It is IMPERATIVE to license landscapers on Agro - ecological skills .We must be able to defend the integrity of nature for the health of present & future generations , and the ENVIRONMENT ! The committee it is taking on to much to work on all fronts!! Environment is a SNAIL PACE SYSTEM! Our role is to be excellent CARE TAKERS ! Allowing nature to perform on it's own!! If we use a RAT RACE STRATEGY we will continue to SUFFER THE CONSEQUENCES !!! Sincerely. Mike g Papa.
