Dears Sirs,

I enjoyed the material presented in your Nov.14 meeting. The realistic look at what it will take to mitigate GHG emissions from our transportation sector was helpful if sobering. Acknowledging the period of pay tolls that will be necessary to facilitate (get over the fiscal 'hump') the transition to EVs is the first step towards making this generally unpopular measure of bringing back highway tolls politically feasible. I feel this 'sell' can be done with the right framing, in regards to both the CGA and the general populace.

(-Also appreciated the clear REMI explanation from Nov.14).

Best,
James Root
