**CERTIFICATION**

---

We have performed an actuarial valuation of the State of Connecticut Other Post-Employment Benefits Program as of April 1, 2006. The results of this valuation, along with supporting data, are set forth in the following report.

We have prepared this report in compliance with Government Accounting Standard No. 45. No attempt is being made to offer any accounting opinion or advice. The calculations reported herein have been made on a basis consistent with our understanding of the plan provisions. Additional determinations may be needed for purposes other than meeting accounting requirements.

In preparing this report, we relied on employee census data, claims, premium, and other information as of the valuation date, furnished by the State of Connecticut. We performed a limited review of the information used directly in our analysis for reasonableness and consistency and have found them to be reasonably consistent and comparable with data used for other purposes. If the information is inaccurate or incomplete, the results of our analysis may likewise be inaccurate or incomplete and our calculations may need to be revised. If there are material defects in the data, it is possible that they would be uncovered by a detailed, systematic review and comparison of the data to search for data values that are questionable or for relationships that are materially inconsistent. Such a review was beyond the scope of our assignment.

On the basis of the foregoing, we hereby certify that, to the best of our knowledge, this report is complete and accurate, all costs and liabilities were determined in conformance with generally accepted actuarial principles and practices, and the methods and assumptions produced results which are reasonable. Differences between our projections and actual amounts depend on the extent to which future experience conforms to the assumptions made for this analysis. Actual experience will not conform exactly to the assumptions made for this analysis. Actual amounts will differ from projected amounts to the extent that actual experience deviates from expected experience.

This report may not be used without Milliman's prior written consent. If this report is distributed to other parties, it must be copied in its entirety, including this section. We understand that the plan sponsor may distribute this report to its auditor in connection with its audit. We will consent to this distribution as long as the work is distributed in its entirety, and the auditor is advised to have an actuary review the work. Milliman does not intend to benefit any third party recipient of its work product, including the auditor, and does not intend to create any legal duty from Milliman to the auditor even if Milliman consents to the release of its work product. In the event that the auditor's audit reveals any error or inaccuracy in the data underlying this report, Milliman requests that the auditor or the plan sponsor notify Milliman as soon as possible.

The undersigned are members of the American Academy of Actuaries and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.

MILLIMAN, INC.

**STATE OF CONNECTICUT  
OTHER POST-EMPLOYMENT BENEFITS PROGRAM**

---

**OVERVIEW OF GASB 43 AND GASB 45**

---

GASB 43 and 45 apply to just about any benefit that is provided after retirement except for pension benefits: medical insurance, dental, vision, and hearing benefits plus life insurance and long term care insurance. These benefits are collectively referred to as Other Post-Employment Benefits, or OPEB. The benefits provided by the State to retirees include medical insurance, dental and vision benefits, and life insurance. The philosophy driving the accounting standard is that these OPEB benefits are part of the compensation that is paid to employees in return for their services, and the cost of these benefits should be recognized while the employees are providing those services, rather than after they have retired. This philosophy has already been applied for years to defined benefit pensions; GASB 43 and 45 extend the same thinking to all other post-employment benefits.

GASB 43 requires OPEB **plans** to disclose information about asset and liability levels and show historical contribution information. GASB 45 requires **employers** to perform periodic actuarial valuations to determine annual accounting costs, and to keep a running tally of the extent to which these amounts are over or under funded. GASB 43 is effective starting in FY 2006-07 for a Phase I government such as the State, FY 2007-08 for a Phase II government, and FY 2008-09 for a Phase III government. GASB 45 is effective for the fiscal year following implementation of GASB 43.

#### **Glossary of Terms**

The **Accrued Liability** is the present value of OPEB benefits accrued to date. For active members, the Accrued Liability is a pro-rata portion of the present value of OPEB benefits based on service to date compared to service at the member's expected retirement date. For inactive members, the Accrued Liability is the present value of future OPEB benefits.

The **Normal Cost** is the present value of the portion of the projected OPEB benefits attributable to the current year.

The **Annual Required Contribution (ARC)** consists of three pieces: Normal Cost plus a Past Service Cost (to amortize the Unfunded Accrued Liability over a period of years) plus Interest from the valuation date to the beginning of the Fiscal Year.

The **discount rate** is used to express future amounts in today's dollars. GASB 45 requires the discount rate to be based on the estimated long-term yield on the investments that are expected to be used to finance the payment of benefits, with consideration given to the nature and mix of current and expected investments.

---

**STATE OF CONNECTICUT  
OTHER POST-EMPLOYMENT BENEFITS PROGRAM**

**DISCUSSION OF KEY ASSUMPTIONS**

---

The Accrued Liability and Annual Required Contribution are highly dependent on two key assumptions: the rate at which we assume medical costs will increase over time, and the discount rate we use to translate future payments into current dollars.

**Medical inflation**

**Baseline rates**                      9% grading down to 5% over 4 years

While the baseline medical inflation rates are reasonable in our view, it is important to recognize that there is significant uncertainty with respect to this important assumption. That is, there are many forces that affect medical trends. For example, changes in medical technology, governmental healthcare programs, healthcare crises (e.g. avian bird flu), and other forces all affect the rate of growth in healthcare costs over time. To demonstrate the effect that the medical inflation rate assumption has on the GASB 45 valuation results, the appendix to this report contains a sensitivity analysis to indicate the significant effect of less favorable assumptions regarding the rate of decline in medical inflation rates from recent levels (i.e., 9%) to an ultimate, more economically stable, medical inflation rate (i.e., 5%) .

---

**STATE OF CONNECTICUT  
OTHER POST-EMPLOYMENT BENEFITS PROGRAM**

**DISCUSSION OF KEY ASSUMPTIONS**

---

**Discount rate**

The discount rate is based on the long-term earnings potential of the investments available to fund these benefits, and therefore depends on the State's OPEB funding policy. Per GASB 45, the discount rate should be based on the estimated long-term yield on the investments that are expected to be used to finance the payment of benefits, with consideration given to the nature and mix of current and expected investments. At the Comptroller's direction, we have used the following discount rates for four different scenarios with respect to the State's OPEB funding policy.

**Unfunded scenario**                      4.50%

If the State decides not to prefund the OPEB benefits, GASB 45 requires the discount rate to reflect the expected earnings of the State's general fund. For this purpose, we used a discount rate of 4.50%.

**Governor's proposal**                      4.70%

The Governor's proposal submitted as part of the biennial budget is to make a one-time contribution to an OPEB trust of \$21 million in addition to ongoing payment of the annual OPEB payouts. Using the blended discount rate methodology discussed in the Actuarial Assumptions section of the report, this funding policy equates to a discount rate of 4.70%.

**Comptroller's proposal**                      6.08%

The Comptroller's proposal is to make a one-time contribution to an OPEB trust of \$100 million plus 10% of budget surpluses thereafter in addition to ongoing payment of the annual OPEB payouts. Based on historical budget surplus figures, the Comptroller has estimated that the budget surplus contributions would start at \$50 million and increase by 5% thereafter. Using the blended discount rate methodology discussed in the Actuarial Assumptions section of the report, this funding policy equates to a discount rate of 6.08%.

**Fully funded scenario**                      8.50%

A discount rate of 8.50% assumes the State establishes an OPEB trust with an investment strategy similar to the SERS trust and adopts a funding policy to prefund the OPEB benefits by paying the Annual Required Contribution. 8.50% is the interest rate set by the Retirement Commission for purposes of the SERS valuation.

---

**STATE OF CONNECTICUT  
OTHER POST-EMPLOYMENT BENEFITS PROGRAM**

---

**SUMMARY OF RESULTS**

---

We have calculated the Accrued Liability and Annual Required Contribution for each of the four discount rate scenarios discussed on the prior page. A detailed breakdown of the Accrued Liability and Annual Required Contribution can be found on the following pages.

(\$ 000s)

<u>Discount rate scenario</u>		<u>Accrued Liability as of April 1, 2006</u>
<b>Unfunded</b>	<b>4.50%</b>	\$21,681,444
<b>Governor's proposal</b>	<b>4.70%</b>	20,877,101
<b>Comptroller's proposal</b>	<b>6.08%</b>	16,361,670
<b>Fully funded</b>	<b>8.50%</b>	11,369,303

		<u>Annual Required Contribution for FY 2007</u>
<b>Unfunded</b>	<b>4.50%</b>	\$1,597,631
<b>Governor's proposal</b>	<b>4.70%</b>	1,544,072
<b>Comptroller's proposal</b>	<b>6.08%</b>	1,252,983
<b>Fully funded</b>	<b>8.50%</b>	955,291

**STATE OF CONNECTICUT  
OTHER POST-EMPLOYMENT BENEFITS PROGRAM**

**GASB 45 SCHEDULE OF FUNDING PROGRESS**

Certain information regarding the funded status of the OPEB plan is required to be disclosed in the State's financial statement once the State has implemented GASB 45. For this illustration, we have used the discount rate for the Comptroller's proposal scenario.

(\$ 000s)

<b>Actuarial Valuation Date</b>	<b>Actuarial Value of Assets (a)</b>	<b>Accrued Liability (b)</b>	<b>Unfunded Accrued Liability (UAL) (b - a)</b>	<b>Funded Ratio (a / b)</b>	<b>Covered Payroll (c)</b>	<b>UAL as a Percentage of Covered Payroll ((b - a) / c)</b>
04/01/2006	\$0	\$16,361,670	\$16,361,670	0%	N/A	N/A

---

**STATE OF CONNECTICUT  
OTHER POST-EMPLOYMENT BENEFITS PROGRAM**

**GASB 45 SCHEDULE OF EMPLOYER CONTRIBUTIONS**

---

Certain information regarding funding of the OPEB plan is required to be disclosed in the State's financial statement once the State has implemented GASB 45. For this illustration, we have used the discount rate for the Comptroller's proposal scenario.

(\$ 000s)

Year Ended June 30	Annual Required Contribution	Actual Contribution Made *	Percentage Contributed
2007	\$1,252,983	\$532,256	42%

\* This figure includes a deposit of \$100 million plus payment of the annual OPEB benefit payouts.

---

**STATE OF CONNECTICUT  
OTHER POST-EMPLOYMENT BENEFITS PROGRAM**

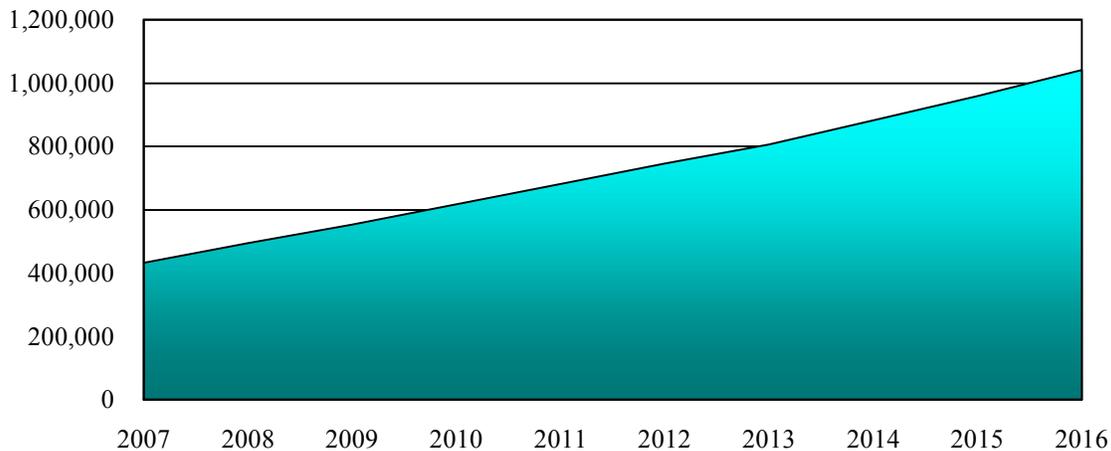

**PROJECTED PAYOUTS**

---

The annual State payments for OPEB benefits are expected to rise sharply in coming years, both because medical and dental costs are expected to rise over time and because more employees will retire and start to receive State-paid OPEB benefits. The table and graph below show the expected annual payments for OPEB benefits for the next 10 years.

(\$ 000s)

Fiscal Year	Annual Payments
2007	\$432,255
2008	493,893
2009	553,440
2010	616,915
2011	682,068
2012	744,817
2013	806,948
2014	882,179
2015	957,933
2016	1,041,164

Please note that these figures represent the true economic cost to the State of providing OPEB benefits, net of any cost-sharing payments made by retirees. These figures may be higher or lower than the premiums paid for these benefits in any given year.

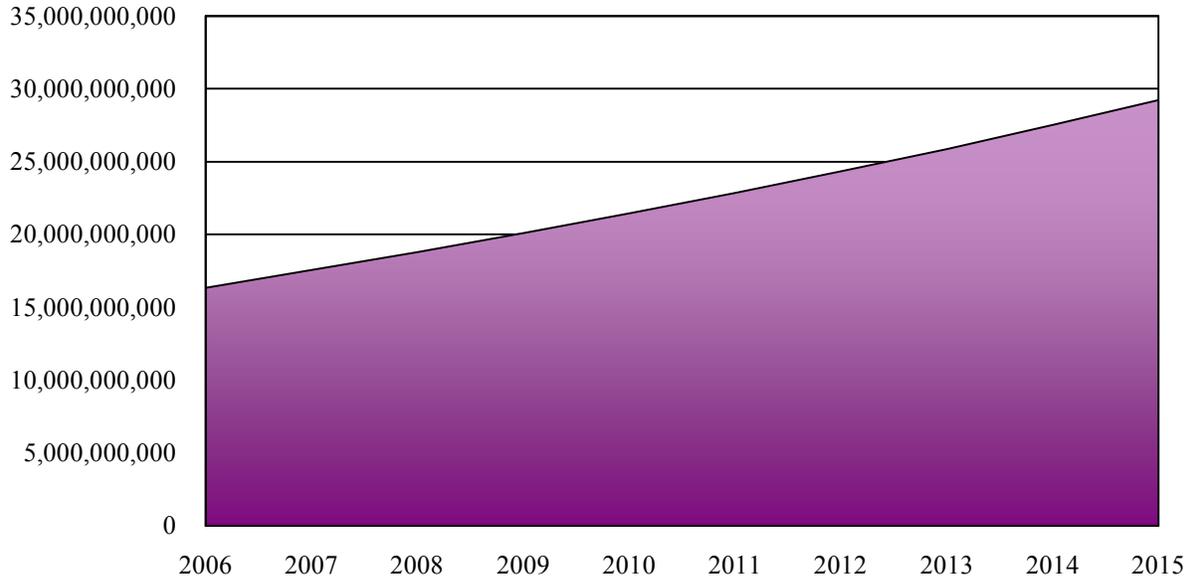

---

**STATE OF CONNECTICUT  
OTHER POST-EMPLOYMENT BENEFITS PROGRAM**

**PROJECTED LIABILITIES**

---

The graph below illustrates how the State's Accrued Liability is expected to grow over the next 10 years. For this illustration, we have used the discount rate for the Comptroller's proposal scenario.

---

**STATE OF CONNECTICUT  
OTHER POST-EMPLOYMENT BENEFITS PROGRAM**

**DETAILED BREAKDOWN OF ACCRUED LIABILITY**

---

On the following pages we provide a detailed breakdown of the Accrued Liability as of April 1, 2006 for each of the four discount rate scenarios discussed previously. We have identified the Accrued Liability separately for several groups of State employees. We have further broken the Accrued Liability into several pieces: benefits that are expected to be paid prior to age 65 (i.e. prior to Medicare) and after age 65 (i.e. after Medicare) to current active members and their covered dependents after retirement, and the same figures for members who have already retired and are currently receiving benefits.

**STATE OF CONNECTICUT  
OTHER POST-EMPLOYMENT BENEFITS PROGRAM**

**DETAILED BREAKDOWN OF ANNUAL REQUIRED CONTRIBUTION**

---

The Annual Required Contribution (ARC) consists of three pieces: a **Normal Cost** (the cost of benefits earned each year should be accrued in that year) plus a **Past Service Cost** (a catch-up accrual to amortize the Unfunded Accrued Liability) plus **Interest** from the valuation date to the beginning of the Fiscal Year.

The amortization period should be reasonably related to the period of service over which OPEB benefits are earned. We have selected a 30 year amortization period, which is the longest period permitted by GASB 45. We have used an amortization method that produces annual payments that are designed to increase over time as payroll grows.

On the following pages we provide a detailed breakdown of the Annual Required Contribution for FY 2007 for each of the four discount rate scenarios discussed previously. As with the Accrued Liability, we have calculated the Annual Required Contribution separately for several groups of State employees.

---

**STATE OF CONNECTICUT  
OTHER POST-EMPLOYMENT BENEFITS PROGRAM**

**CENSUS DATA**

---

Census data was provided by the State of Connecticut Retirement & Benefit Services Division as of April 1, 2006 for the following groups: SERS (active and retired members), JFSMCCRS (active members), PJERS (retired members), Teachers (active and retired members), ARP (active and retired members), and Others (active and retired members). The data included face amounts of life insurance for retired members. For the following groups, census data from the most recent actuarial valuation of the applicable pension plan was used: JFSMCCRS (retired members - July 1, 2006 valuation), PJERS (active members - January 1, 2006 valuation), SERS (terminated vested members with at least 10 years of service – July 1, 2006 valuation).

**Assumptions Regarding Incomplete Data**

For any active member who was reported with missing compensation, compensation was set equal to the average compensation for the active members in the applicable group who were reported with complete data.

Gender was not reported for current retired members for the following groups: Teachers, ARP, Widows and Specials (the latter two are subsets of the Others group). Based on our review of the gender information reported for the respective active member groups, we assumed that 50% of current retired Teachers, 60% of current retired ARP members, and 100% of current retired Widows and Specials members are female.

The actual reported dependent coverage election (medical and dental) for each current retired member was used, with female spouses assumed to be the same age as male spouses.

**Continuation of Medical and Dental Benefits after Retiree's Death**

It is our understanding that retiree medical and dental benefits continue after the retiree's death only if the dependent is receiving a survivor pension (Joint Annuitant or Certain and Life form of payment). Based on our analysis of the pension forms of payment and retiree medical dependent coverage elected by current retired members, we assumed that 64% of current and future retired members have medical and dental benefits that continue after the retiree's death, and 36% have medical and dental benefits that stop upon the retiree's death.

**Unreported Terminated Vested Members**

It is our understanding that records for terminated vested members are maintained by the Retirement Division only for members who submit a retirement application. There are an unknown number of former employees who are eligible for OPEB benefits upon retirement but who have not submitted a retirement application and were therefore not reported to us for purposes of this valuation. In order to approximate the size of this unreported population, we studied SERS census records for the past ten years to identify the probable number of entrants to, and exits from, this unreported population. On this basis, we determined that the ratio of total terminated vested members who are eligible for OPEB benefits to the number of such members that were reported to us is 6.77. We further assumed that the demographic profile of unreported members is the same as for reported terminated vested members.

**Summary of Census Data**

The following pages provide key statistics about the members included in this valuation.

---

**STATE OF CONNECTICUT  
OTHER POST-EMPLOYMENT BENEFITS PROGRAM**

**MEDICAL AND DENTAL COST DATA**

---

We received information regarding the State's claims experience, plan designs, and census. We augmented and normalized this data with information from the Milliman Health Cost Guidelines. The adjusted cost figures were utilized to smooth claims projections for the valuation.

**Medical Benefits**

Based on information provided by the State regarding the matrix of 2006-2007 retiree medical premiums and current retirees' medical plan elections, the following 2006-2007 weighted average monthly blended medical premiums and retiree contribution percentages were used for MedPlan codes\* K, S, P, Q, and R:

	<u>Monthly Blended Medical Premiums</u>		<u>Retiree Contribution Percentages</u>	
	Retiree	Spouse #	Retiree	Spouse #
Pre-65	671.57	860.25	2.77%	2.53%
Post-65	507.70	463.16	0.00%	0.04%

\* For all other MedPlan codes (D, O, A, B, E, I, J, G, L, N, M, H), the retiree and spouse contributions are zero (both pre and post-65).

# Includes amounts for any additional dependents.

**Medicare Part B**

For calendar year 2006, the Medicare Part B premium for Medicare eligibles is \$88.50 per month. Starting in 2007, the Medicare Part B premium that is charged varies by income level. For purposes of this valuation, we have assumed that the State will reimburse the Medicare Part B premium at the basic level and that there is no additional reimbursement due to the income surcharge.

**Dental Benefits**

Based on information provided by the State regarding current retirees' dental plan elections and monthly dental premiums (retiree contributions), the following 2006-2007 weighted average monthly blended dental premiums (retiree contributions) were used.

	<u>Monthly Blended Dental Premiums (retiree contributions)</u>	
	Retiree	Spouse #
Pre-65	18.86	19.05
Post-65	17.39	17.54

# Includes amounts for any additional dependents.

**STATE OF CONNECTICUT  
OTHER POST-EMPLOYMENT BENEFITS PROGRAM**

**MEDICAL AND DENTAL COST DATA**

A fundamental element of the valuation of retiree medical and dental benefits is to establish the current total annual cost per beneficiary to provide the State's retiree plans of benefits. Since the valuation system works from the cost for a person age 65, we had to adjust actual experience to normalize for demographics and Medicare eligibility. This analysis is complicated by the fact that some Medicare-eligible beneficiaries have non-Medicare eligible spouses and vice versa, requiring a reallocation of spouses into their proper Medicare-eligibility category.

The first step in our calculation for determining the cost adjustment factor curves for the State was to determine the demographic factors that would be used to normalize the State's retiree population to produce a value for a retiree age 65. We used a census file that contained both the Medicare retirees and non-Medicare retirees. Using Milliman's *Health Cost Guidelines* we estimated the dependent counts for the non-Medicare retirees based on their demographics, since the data provided did not separately identify dependents. We then used membership counts from the census file and Milliman's *Health Cost Guidelines* to determine the demographic adjustment factors to normalize the costs for this population to be representative of a 65 year old beneficiary.

We also used the census to determine a reallocation factor. Reallocation means the assignment of the dependent of a Medicare-eligible beneficiary's spouse that is not Medicare-eligible to the non-Medicare category, and vice versa. The claim totals and membership that we used for our calculation were grouped based on the retiree's status (Medicare vs. non-Medicare). This grouping put non-Medicare dependents in the Medicare retiree totals and Medicare dependents in the non-Medicare retiree total. We were able to calculate the reallocation factors using the census at a member level because we had an age for each retiree and dependent in the census file. The reallocation factor assigns the membership and claim totals based on each beneficiary's Medicare or non-Medicare status.

We calculated a per member per month cost for Medicare and non-Medicare retirees for Medical and Pharmacy, Pharmacy only, and Dental. Using a claims and membership file, we calculated the average monthly total paid claims for the experience period and then applied an annual trend rate of 9% for medical and pharmacy and 3.5% for dental to put the claims on an incurred basis for a July 1, 2006 effective date. We then used an 81% loss ratio to gross up the claims to a premium equivalent, as the State's cost is based on a fully insured premium. 81% was based on an average of the pricing loss ratios for the insurers that provide the retiree coverage to the State.

We then used the reallocation factors to reallocate the cost and membership of the dependents that were grouped by their spouse's status to the appropriate group based on the beneficiary's status. This cost was then demographically adjusted using the demographic factors that we calculated from the census file and denominated by the membership to produce the cost for an age 65 beneficiary. That cost serves as the starting point for the State's cost to provide retiree benefits. The cost is adjusted for each person's age and is trended over time to produce the cost curves. The end result of this analysis was a set of factors that express the expected relationship of the true cost of medical and dental benefits across age and gender. Representative factors are shown below.

Age	<u>Medical (with Rx)</u>		Age	<u>Dental</u>	
	Retiree	Spouse		Retiree	Spouse
40	2.35%	2.09%	40	1.47%	1.50%
50	4.63%	4.48%	50	0.65%	0.67%
60	4.36%	4.25%	60	0.14%	0.14%
70	2.14%	2.21%	70	0.00%	0.00%
80	1.25%	1.13%	80	0.00%	0.00%

---

**STATE OF CONNECTICUT  
OTHER POST-EMPLOYMENT BENEFITS PROGRAM**

**ACTUARIAL METHOD**

---

The actuarial funding method used is the **Projected Unit Credit Cost Method**. The Annual Required Contribution consists of three pieces: Normal Cost plus a payment towards the Unfunded Accrued Liability plus interest from the valuation date to the start of the fiscal year.

The **Accrued Liability** is determined directly as the present value of benefits accrued to date, where the accrued benefit for each Member is the pro-rata portion (based on service to date compared to service at the member's expected retirement date) of the **projected** benefit payable at death, disability, retirement or termination.

The **Normal Cost** is similarly determined as the present value of the portion of the **projected** benefit attributable to the current year.

The **Unfunded Accrued Liability** is the Accrued Liability less the value of any plan assets.

**Future Retiree Coverage** 100% of current active and terminated vested members are assumed to elect coverage under the OPEB program.

**Future Dependent Coverage** 80% of current active and terminated vested members are assumed to elect dependent coverage at retirement, with female spouses assumed to be the same age as male spouses.

---

**STATE OF CONNECTICUT  
OTHER POST-EMPLOYMENT BENEFITS PROGRAM**

**ACTUARIAL ASSUMPTIONS**

---

**Health Care Inflation Rate** We determined our long term trend rates by using health cost projections released by the Office of the Actuary at the Centers for Medicare and Medicaid Services (CMS). The release contained projections of the medical and pharmacy cost and population growth for 2004, 2005, 2006, and 2014. Using these cost and population projections, we determined the year over year trend for both cost and population growth. We then annualized the trend in cost and adjusted for population growth.

Using the annualized trend and an assumed 3% annual trend in administrative costs, we determined the total trend over the 8 year period from 2006 through 2014 for both medical costs and administrative costs. We then blended the total cost trend and the total administrative trend to determine the total overall trend for this period. We then determined year over year trend rates to match the total 8 year trend rate.

Our resulting health care inflation rate assumption is shown below:

<u>Year</u>	<u>Medical</u>	<u>Dental</u>
2006-2007	9.0%	4.0%
2007-2008	8.0%	3.5%
2008-2009	7.0%	3.0%
2009-2010	6.0%	3.0%
2010-2011 and thereafter	5.0%	3.0%

---

**STATE OF CONNECTICUT  
OTHER POST-EMPLOYMENT BENEFITS PROGRAM**

---

**ACTUARIAL ASSUMPTIONS**

---

**Discount Rate**

A discount rate of 4.50% was used for the scenario in which the State does not establish an OPEB trust but continues to fund the OPEB benefits on a pay-as-you-go basis. 4.50% reflects the expected long-term investment returns on the State's general assets.

A discount rate of 8.50% was used for the scenario in which the State establishes an OPEB trust with an investment strategy similar to the SERS trust and adopts a funding policy to fully prefund the OPEB benefits by paying the Annual Required Contribution. 8.50% is the interest rate set by the Connecticut State Employees Retirement Commission for the SERS funding valuation.

If the State adopts a funding policy to contribute more than the annual benefits as they come due but less than the full ARC, GASB 45 requires the discount rate to be a blend of the discount rates for the full prefunding policy and the pay-as-you-go policy. The following methodology was used to determine the blended discount rate for the Governor's proposal and the Comptroller's proposal to establish funding policies to make contributions to an OPEB trust in addition to paying the pay-as-you-go cost:

- The expected return on trust assets for each of the next ten years was calculated assuming that trust assets earn 8.50%, except that pay-as-you-go amounts were assumed to reside in the trust for an average of 3 months and be invested in funds similar to the State's general assets (i.e., earn 4.50% annually).
- The expected asset level in the trust was then determined for each of the next ten years, based on any initial deposits plus any ongoing contributions.
- A weighted average blended rate was determined for each of the next ten years based on 8.50% weighted by the expected asset level in the trust and 4.50% weighted by the annual pay-as-you-go levels.
- The weighted average blended rates for the ten year period were then averaged to arrive at the final blended discount rates of 4.70% for the Governor's proposal and 6.08% for the Comptroller's proposal.

---

**STATE OF CONNECTICUT  
OTHER POST-EMPLOYMENT BENEFITS PROGRAM**

---

**SUMMARY OF PLAN PROVISIONS**

---

**Eligibility**

**All groups except ARP** Retire with a Normal, Early or Disability Retirement under the applicable retirement system.

**ARP** Age 55 with 10 years of service.

**Life Insurance**

Pay-related coverage, equal to 50% of the basic coverage amount immediately before retirement. The minimum post-retirement coverage amount is \$10,000.

For retirees with less than 25 years of service, the above coverage amount is proportionately reduced based on years of service, and is not subject to the \$10,000 minimum.

Members who retire under the hazardous duty provisions of C.G.S. 5-173 receive coverage equal to 50% of the basic coverage amount immediately before retirement, regardless of the number of years of service.

Retired members who are totally and permanently disabled before age 60 receive coverage equal to 100% of the basic coverage amount.

Probate Judges are not eligible for post-retirement life insurance.

Terminated vested participants are not eligible for post-retirement life insurance.

**Dental Benefits**

Retirees are able to select one of the following plan options:

**United Healthcare:** basic plan

**United Healthcare:** enhanced plan

**Aetna:** dental HMO

Retirees pay 80% of the premium for dental benefits on the basis of subsidized premiums. Retirees who initially do not elect dental coverage and subsequently enroll for dental coverage cost share on the basis of unsubsidized premiums.

---

**STATE OF CONNECTICUT  
OTHER POST-EMPLOYMENT BENEFITS PROGRAM**

---

**SUMMARY OF PLAN PROVISIONS**

---

**Medical Benefits**

Retirees are able to select a plan option and a medical vendor as summarized below. Each plan option provides hospital, medical and pharmacy coverage. Medicare is primary and the State plan is administered as a carveout to Medicare. For Medicare eligibles, the State also provides Medicare Part B premium reimbursement for both the retiree and dependent.

**Gated Point of Enrollment (POE):** Oxford, Health Net, Anthem

**Non-gated Point of Enrollment (POE):** Oxford, Health Net, Anthem

**Point of Service (POS):** Oxford, Health Net, Anthem

**PPO:** Anthem

**Out-of-Area PPO:** Oxford, Anthem

Retirees pay a portion of the medical premium as follows:

**Retired before July 1, 1997 or under 1997 ERIP:** retiree pays 0%

**Retired July 1, 1997 to June 30, 1999:** retiree pays 0%, except those who elected the Anthem State Preferred PPO option pay up to a maximum of approximately 3%.

**Retired July 1, 1999 or later:**

POE/out of Area PPO: retiree pays 0%

Pre-65 POS/PPO: retiree pays a variable amount for retiree and dependent coverage up to a maximum of approximately 3%

Post-65 POS/PPO: retiree pays 0% for retiree coverage and pays a variable amount for dependent coverage up to a maximum of approximately 3%

This summary is intended only to describe our understanding of the essential features of the benefits that will be provided by the State to future retirees. All eligibility requirements and benefit amounts shall be determined in strict accordance with the relevant plan documents. To the extent that this summary does not accurately reflect the plan provisions, then the results of this valuation may not be accurate.

**STATE OF CONNECTICUT  
OTHER POST-EMPLOYMENT BENEFITS PROGRAM**

**APPENDIX: MEDICAL TREND SENSITIVITY ANALYSIS**

---

To demonstrate the effect that medical trend has on the Accrued Liability and the Annual Required Contribution, we analyzed the sensitivity of our results to this assumption by using an alternative medical inflation rate shown below:

<b><u>Sensitivity Analysis Medical Trend Rate</u></b>	
2006-2011	9.0%
2011-2012	8.6%
2012-2013	8.2%
2013-2014	7.8%
2014-2015	7.4%
2015-2016	7.0%
2016-2017	6.6%
2017-2018	6.2%
2018-2019	5.8%
2019-2020	5.4%
2020-2021 and thereafter	5.0%

The exhibits on the following pages present the same liability measures and contributions contained in this report but using the above trend rates as the basis for projecting future medical costs.

---

**STATE OF CONNECTICUT  
OTHER POST-EMPLOYMENT BENEFITS PROGRAM**

**APPENDIX: SUMMARY OF RESULTS**

---

We have calculated the Accrued Liability and Annual Required Contribution using the sensitivity medical trend rate scenario and each of the four discount rate scenarios discussed in the assumptions section of the report. A detailed breakdown of the Accrued Liability and Annual Required Contribution can be found on the following pages.

(\$ 000s)

<b>Discount rate scenario</b>	<b>Accrued Liability as of April 1, 2006</b>
<b>Unfunded</b>	<b>4.50%</b> \$26,927,687
<b>Governor's proposal</b>	<b>4.70%</b> 25,895,452
<b>Comptroller's proposal</b>	<b>6.08%</b> 20,110,682
<b>Fully funded</b>	<b>8.50%</b> 13,745,126
<hr/>	
	<b>Annual Required Contribution for FY 2007</b>
<b>Unfunded</b>	<b>4.50%</b> \$2,026,030
<b>Governor's proposal</b>	<b>4.70%</b> 1,955,875
<b>Comptroller's proposal</b>	<b>6.08%</b> 1,573,597
<b>Fully funded</b>	<b>8.50%</b> 1,179,195

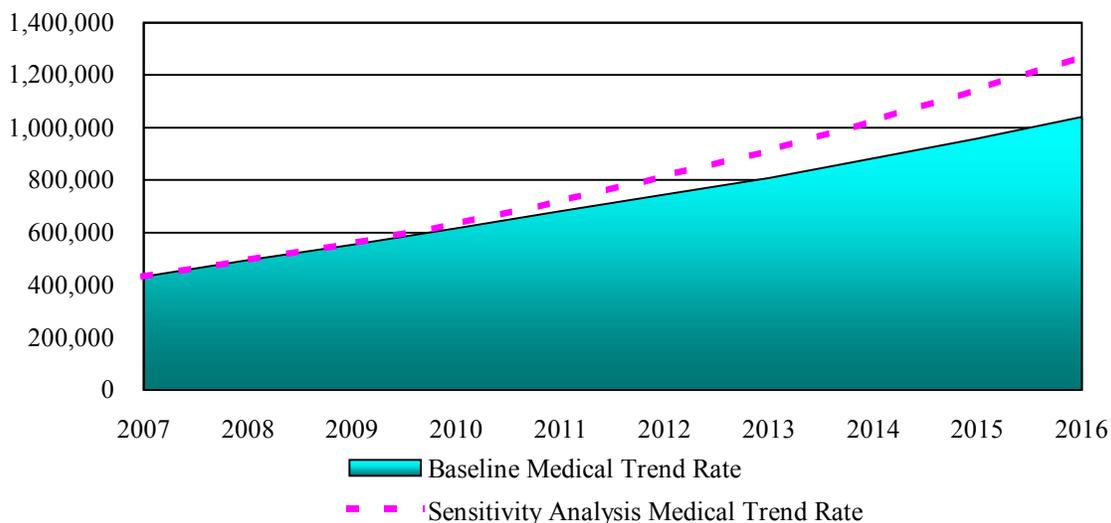

**STATE OF CONNECTICUT  
OTHER POST-EMPLOYMENT BENEFITS PROGRAM**

**APPENDIX: PROJECTED PAYOUTS**

The annual State payments for OPEB benefits are expected to rise sharply in coming years, both because medical and dental costs are expected to rise over time and because more employees will retire and start to receive State-paid OPEB benefits. The table and graph below show the expected annual payments for OPEB benefits for the next 10 years under the baseline medical trend rates and the sensitivity analysis medical trend rates described in the report.

(\$ 000s)

Fiscal Year	Baseline Medical Trend Rate	Sensitivity Analysis Medical Trend Rate
2007	\$432,255	\$432,255
2008	493,893	494,019
2009	553,440	558,593
2010	616,915	633,906
2011	682,068	719,978
2012	744,817	815,081
2013	806,948	912,337
2014	882,179	1,026,911
2015	957,933	1,144,064
2016	1,041,164	1,271,291

Please note that these figures represent the true economic cost to the State of providing OPEB benefits, net of any cost-sharing payments made by retirees. These figures may be higher or lower than the premiums paid for these benefits in any given year.

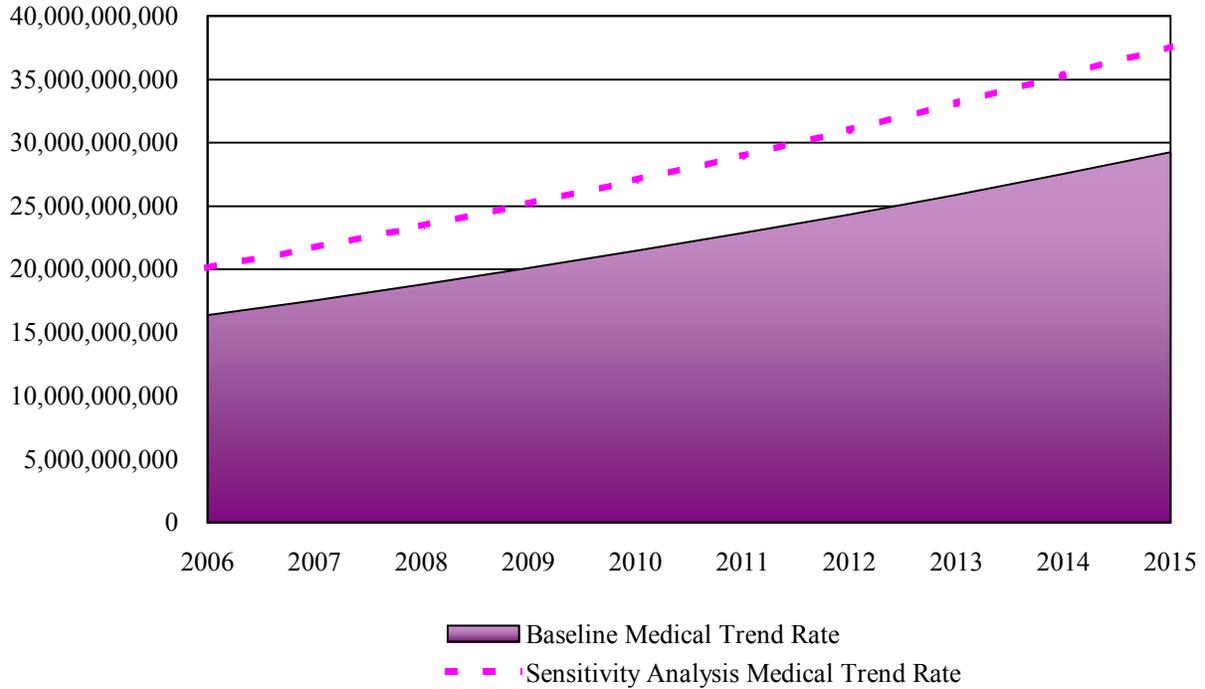

---
